FEB 1st 1948

PHONE 3156

READ CAREFULLY BEFORE ORDERING

Orders from this list will be delivered anywhere in the United States or Canada. We do not solicit orders for less than \$2.00 to be delivered via Parcel Post or Express. On all orders under \$5.00 cash must accompany order. On orders of \$5.00 or more you may send 25% with order and the balance before order is shipped to you, or the order may be shipped to you C.O.D. for the balance.

WHERE ORDER IS FROM BOTH THE RETAIL AND WHOLESALE LIST, we will ship bulbs to you collect. To compensate for your orders taken from the retail list we will include extra bulbs to make up the difference in the transportation charges you might pay. In most instances we note that the weight on the bulbs taken from the retail list included in wholesale order does not increase the cost of transportation by only a few cents.

We exercise the greatest care in selecting bulbs to fill your order. However, due to the soil and climatic conditions which prevail throughout the country and also the many dips and insecticides which are being tried out at the present time, WE DO NOT GUARANTEE THE GROWTH AND PRODUCTIVENESS OF ANY OF THE BULBS SHIPPED OUT BY US. If, for any reason you are dissatisfied with any part of your order when received kindly return same to us IMMEDIATELY and your money will be refunded.

We advise early orders. For one thing it means you get the pick of the crop. Bulbs move fast in February and March so late orders have to take the left overs, so to speak. Many of our customers place their orders early and have us hold them to be shipped at a later date. This we gladly do.

In placing orders for bulblets, especially those of the newer varieties, ALL ORDERS SHOULD REACH US BY MARCH THE 15th.

DISCOUNTS

We have had so many customers say the so called discounts are too complicated to bother with inasmuch as all NEW VARIETIES; those marked NO DISCOUNT and the SPECIAL COLLECTION OFFERS have to be deducted from the original order. So they just dump the whole thing back in our lap. This year we have discontinued the percentage discount and will put in Extras or Overcount to the value of your order, less the above mentioned discounts, recognized by most commercial growers. If you care to drop a hint as to some variety you would like to try out just let us know when sending in your order. Most times it works out.

NO PICTURES * JUST PRICES TO FIT THE PICTURE

In going over our price list you will no doubt find many items which seem below the average. Our list is not a glamorous array of color, therefore, we are not put to the great expense which only adds up to higher prices to you. In other words the purchaser benefits in the prices he pays, but of course goes without the pretty pictures. I know of one time in making a purchase of bulbs myself, one of the best buys I ever made was scribbled on a post card with lead pencil, from a most reputable grover.

LATE ORDERS

Considerable delay in getting your order away at times is encountered due to the fact we are sold out on certain sizes of the newer varieties and it takes extra correspondence to get these orders on their way. It would help a lot if you would let us substitute size (not variety) so stating in your order.

UNCLE SAM AGREES

Air mail will hurry your order to us if you are any distance away. However, save your money on Special Delivery. 'The Boy On' The Bicycle' quit. So we do not get Special Delivery letters until the Rural Carrier comes along.

HEADACHES AND HEARTACHES

We find in most of the correspondence from our Glad friends their greatest trouble comes from being ' too kind' to their bulbs at planting time. That is - those who write of their troubles.

Trying some unheard of concoction as a disease preventative (and the bulbs didn't need it), which the bulbs couldn't take and the results too sad to relate. "My bulbs didn't grow" or "They started to grow and then turned yellow".

All the treatment your bulbs need at planting time is a 1/2 to 3 hour soak in the recommended Lysol or Supergermite bath. (One tablespoon to one gallon of water). Then if possible a 10 minute dip in Calogreen if you care to use it. Plant your bulbs while still wet and quit fussing around with any more dips etc.

In the fall at digging time wash and give a bath in Lysol or Supergermite dip for 10 or 15 minutes, store in a shallow tray for drying. Follow this practice and you will have good bulbs in your storage

Dig early - Dry fast - 80 degrees of heat won't hurt with good ventilation. Bulbs should clean easily in about 3 weeks.

FERTILIZER

In the use of commercial fertilizers use that which is low in Nitrate. 3-10-10 or 5-10-10 are fine ratios to use. Avoid the use of raw barn yard fertilizer. Personally we want no chicken fertilizer in any stage. Good leaf mold mixed in the trenches at planting time give excellent results for bloom.

THRIP

If your locality makes it compulsory to spray for this pest there are several recommended sprays for thrip. However - they should be applied at regular intervals. At least once every 10 days or after a hard rain. Two ounces of Tartar Emetic - 6 ounces of brown sugar well mixed in 3 gallons of water. A number of articles on the use of D.D.T. have been written. However - by all means be careful not to breathe any of the dust. KEEP THE WIND BEHIND YOU.

ALL WASHINGTON CUSTOMERS - ADD 3% SALES TAX

NEW INTRODUCTIONS FOR 1948

ANNETTE

A large clear white; no other markings. Grows to a height of 56 inches. 18 to 20 bud spike with florets up to 5-1/2 to 6 inches. 26 to 28 inch flower head. Will open up to seven wide open florets with 5 to 6 buds showing color. Good heavy tall plant growth. A fine shipper and already accepted as a Leading White for the florist trade here in the Pacific Northwest. Have never had a crook in this variety.

1947 AWARDS

FIRST TIME EVER EXHIBITED

By Popular Vote, voted the Most Beautiful Glad at the Pacific Northwest show at Everett, Wash. Winner of the Blue Ribbon in the Single Spike Seedling Class and also won the J. C. Lodge Perpetual Trophy Award for the Best 6 Spike Vase of Seedlings at the Washington State show at South Tacoma, Washington.

ANNETTE is a fine propagator and bulblets germinate well, making large size bulbs from bulblets. A large stock of this variety makes it possible for a low introductory offer.

Large or Medium....	Each \$2.00	10 for \$15.00
Small--Five bulbs for....	5.00	10 for 8.00

Bulblets sold only with purchase of bulbs.
10 for \$2.00 or 100 for \$15.00

.....

RED WING

(Wright-Graff 1948)

It was our pleasure to grow this new, large, tall growing Red this past season and can truthfully say it is everything which the introducer claims for this variety.

We grew Red Wing to a height 67 inches from large size bulbs. Flower head of 38 inches. 26 bud spike which opened 8 five and one half inch florets. Plants were tall and straight with fine foliage

Florets are slightly recurved and ruffled, with a mid rib in the petal which lends appeal. Spikes cut and brought inside opened well to the tip. Also holding their color well. Can say from growing this variety myself that Red Wing is a good producer of bulblets. As to their germinating ability the introducer says; "germination is very good, producing tall saleable straight spikes". Number 6 bulbs produced 20 bud spikes with 25 inch flower heads for me.

Priced for 1948 Introduction

Large \$5.00	Medium \$4.00	Small \$3.00
--------------	---------------	--------------

Bulblets sold only with a Large Bulb..... 10 for \$10.00

QUEEN CHARLOTTE

(1947)

A clear soft yellow, no other markings. Lower florets slightly deeper. Will open 10 to 12 four and one half to five inch florets on a 24 to 26 bud spike, with six to eight buds showing color. Never crooks faces well and is not crowded. Spikes when cut will bloom to tip. It is a very good shipper. We had spikes of Queen Charlotte with 15 open. Makes a good increase of bulblets and bulblets germinate well.

In 1946 we had the misfortune of planting Queen Charlotte on a piece of ground, unknown to us, had been pretty badly burned. This gave us some concern last spring at selling time.

However our plantings for 1947 was much different and we have a very nice stock of this variety.

Queen Charlotte has never made large sized bulbs from bblts. for us. Our large sized bulbs this year are from number 6 and smaller.

At the 1946 Trial Gardens of the N.E.G.S. Massachusetts - Michigan and Washington, Queen Charlotte scored high in all three gardens.

Already predicted as the Champion of many shows to come.

PRICED FOR 1948

Large or Medium each \$7.50

Small each \$5.00

Bulblets for sale only with the sale of bulbs, each 1.00
10 for \$7.50

FLOWER GIRL

(1947)

A small flowered clear white, petals are twilled or needlepoint type, triangular shaped florets. Grows to a height of 50 inches with a twenty bud spike, opening 4 to 6 florets; 3 to 3 and 1/4 inches in size from large bulbs. Makes large bulblets which germinate and bloom easy.

Flower Girl is an early bloomer, being one of the first to bloom in our planting. One of the best for flower arrangements and table decorations.

Large \$1.00

Medium .75

Small .50

Bulblets 10 for \$1.00

1948 PRICES PREPAID

VARIETY		Large	Med.	Sml.	Bulblets

				.25	100- .25
ORIENTAL PEARL; Seems to be praised to the sky as a fine new large cream. A very fast propagator and germinator. Texture good.	Each 10	2.00 ---	1.50 12.00	1.00 8.00	10- 1.60 100- 12.00
PAYMASTER; New large purple. White spear on lower petals. Will open 6 with 8 in color.	Each	---	1.50	1.00	10- 1.60
PFITZER'S MASTERPIECE; A fine light pink for the cut flower trade. Opens many.	3 10	.25 .70	5-.25 .40	---	---
				.25	100- .25

VARIETY		Large	Med.	Sm1.	Bulblets
PINK RADIANCE: Heavy textured large pure pink without markings. Opens 8 to 10	Each 10	.12 1.00	3-.25 .70	----- .50	100- .30
PURPLE SUPREME: Fine glad for color but does not do well in damp climate. Opens 8	10		4-.25 .50	----- .30	100- .25
QUEEN CHARLOTTE: See 1947 Introductions.					
RADIANCE: Tall, straight salmon red. Early. Could be called a glorified J.S. Bach. Fast propagator. Opens 8 somewhat ruf led florets.	Each 10	.25 2.00	2-.25 1.00	3-.25 .60	25- .50 100- 1.50
R. B.: Tall large golden brown. A rich fall color. Hard to describe. A good to look at smoky. Bulblets will bloom.	3 10	.30 .80	2-.15 .60	----- .30	100- .40
RED CHARM: (Butt) One of the best deep scarlet reds. A show winner. Opens 8 and is an exceptionally fine propagator. Early.	2 10	.25 1.00	4-.25 .50	----- .30	100- .50
RED RASCAL: Very large medium red. Ruffled, opens 6 to 7 Fine increaser and bulblets will bloom. Attracts plenty of attention.	Each	3.00	2.00	1.00	Ea. .30 10- 2.40
RED WING: See 1948 Introductions					
RITA MAE: Medium light red. More cherry red, with yellow throat line. Will open 9 to 10 on a tall spike. Nice bulbs from bblts.	Each 10	1.00 8.00	.75 6.00	.50 4.00	2- .30 10- 1.00
SILENTIUM: Blotched white, straight wiry stem. Fast increaser. 100% cutter	3 10	.25 .70	5-.25 .40	----- -----	100- .25
SILVER WINGS: Very outstanding near white. Beautiful ruffled. Picardy sport similar to Leading Lady. Some say better, opens to 8	Each 10	1.00 8.00	.75 6.00	.50 4.00	10- .60 100- 4.80
STOPLIGHT: Brilliant ruffled red. Fine healthy grower. Very fast propagator	3 10	.25 .70	5-.25 .40	----- .25	100- .25
SUMMER GAL: Beautiful geranium pink. The hard to get color. Will open 8 - 6 inch florets. No fading or crooks. Demand heavy	Each 10	3.00 ---	2.00 16.00	1.00 8.00	Ea. .30 10- 2.00
TAKINA: Tall imense rosy purple. Always straight, Very popular with florists.	2 10	.20 .80	4-.25 .50	----- -----	----- -----
TRALEE: Light rose with small amber feather in throat. Originator says "will open 8 4 1/2 inch florets on 20 bud spike.	Each	4.00	3.00	2.00	Ea. .50 10- 4.00
TRUE LOVE: Early ruffled shell pink which opens 6 to 8 five inch florets. This is one of the most popular of recent introductions. Perhaps one of the most beautiful glads today. One you cannot go wrong on.	Each 10	.60 4.80	.40 3.20	.25 2.00	10- .35 100- 2.50

VARIETY		Large	Med.	Sml.	Bulblets
TWILIGHT DREAM: A mid late rose and tan	Each	3.00	2.50	2.00	Ea. .30
with a cream throat. A perfectly blended	10	24.00	20.00	16.00	10-2.40
smokey which opens 6 to 7 on a straight stem					
Valeria: Good reliable red. Very bright.	2	.25	4-.25	---	---
Opens well when cur tight. Not new but good.	10	1.00	.50	---	---
VAN GOLD: Early deep yellow. Good hot	Each	.25	.15	2-.15	10- .25
weather glad. Wiry stem. Opens 6. Popular	10	2.00	1.20	.60	100-1.80
WAX MODEL: Clear white such as Annamae, a	Each	2.00	1.50	1.00	Ea. .25
thin line of lavender in throat. Tall, straight			per 10-	8.00	10-2.00
and early. 5 to 6 florets, 5 inch, Nice glad.					
Not enthused with this in '46 but it performed fine in '47 after acclimation.					

ALL WASHINGTON CUSTOMERS ADD 3% TAX

In ordering from the foregoing list you may order 5 bulbs where listed at the 10 rate. However, this does not apply to bulblets where listed as per 10. In listing at 2- .25 or 4- .30 etc. that is just what it means. Do not split these listings and order 1 or 2 at the given rate. We cannot afford to handle orders for less than we have them listed. On any of the varieties which are listed for more than \$1.00 for a single bulb, you may if you desire order not less than 3 bulbs at the 10 rate.

On all the White Sports of Picardy which we have grown, we find there is a tendency for them to revert back to the Picardy color. Also, that single petals in a floret will show signs of pink. We are able to rouge out all that bloom in the rows but it is impossible to catch those which do not bloom before digging time or the stock grown from bulblets. Consequently we cannot guarantee that stock grown from the real small sizes or bulblets will be true. One thing we have noticed is, that stock which has been rouged out of these varieties is of much better quality than the original Picardy. Checking these demerit marks against both Leading Lady and Silver Wings we believe both varieties are well worth growing.

In summing up the activities of 1947 can truthfully say it turned out pretty good. We found as usual the many fine people attending the shows and our own awards were gratifying. At the Pacific Northwest show our Red Charm won Blue Ribbons in the single and three spike open and 25 spike Basket class only to turn around and win the Sweepstakes in all three divisions. The winnings of Annette as stated elsewhere in this list, was, most certainly to our liking. And to top those Awards the D.C. Everest, Best Air Shipment Trophy was returned to us for second time in two years, for Annette. Having been won in 1947 on a shipment of Abnaki, which I predict will be to the Orange class what Minuet was to the Lavenders.

We have harvested a fine crop of bulbs and can assure our new customers some mighty fine stock. We wish to thank each and every one of our old customers for the fine orders it has been our pleasure to receive and want to extend our thanks for the many fine letters which we have received from you. We'll be seeing you at the shows in '48 and do hope you enjoy a fine season.

Sincerely,

W. A. W.

OUR LOCATION ? 4/10ths mile, on the pavement, south of the Valley View Hospital. On west side of pavement. Just ask anybody. We are all neighbors.

* Leading Lady sizes 4 - 5 and 6 have slight mix of Elizabeth the Queen.

** Bulblots on Abnaki are moving out fast. Stock getting short.

All bulblots are sold dry measure, which is considerable more than liquid quart

25 bulbs of a size or variety may be purchased at the 100 rate on any of the varieties listed per 100 rate. A pint of bulblots may be purchased at quart rate.

There is no Tax on orders coming from outside the State of Washington. However, unless bulbs are being purchased for resale, ALL WASHINGTON CUSTOMERS shall include the 3% Sales Tax, except those purchasing bulbs to be grown on for the retail cut flower trade.
